The present amino acid sequence is the complete human prepro-vascular endothelial growth factor (VEGF)-C. VEGF-C has the ability to stimulate re-endothelialisation of an injured blood vessel, without significant stimulate of smooth muscle cell proliferation. It can bind to and stimulate VEGFR-2 (vascular endothelial growth factor receptor) and/or VEGFR-3 phosphorylation in cells that express such receptors. An anti-restenosis agent comprising either a VEGF-C gene or protein is used in a method to reduce or prevent restenosis and stenosis of a blood
                                                                                                                                Claim 5;

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      "Structure of the MDM2 oncoprotein bound to the transactivation domain.";
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Levine A.J.,
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              X-RAY CRYSTALLOGRAPHY
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          DISEASE: SEEMS TO BE AMPLIFIED IN CERTAIN TUMORS (INCLUDING SOFT TISSUE SARCOMAS, OSTEOSARCOMAS AND GLICOMAS). A HIGHER FREQUENCY OF SPLICE VARIANTS LACKING P53 BINDING DOMAIN SEQUENCES WAS FOUND IN LATE-STAGE AND HIGH-GRADE OVARIAN AND BLADDER CARCINOMAS. FOUR OF THE SPLICE VARIANTS SHOW LOSS OF P53 BINDING. THAT FAILED TO MISCELLANGOUS: MUND RINGER MUTATIONS THAT FAILED TO UBIQUITINATE P53 IN VITRO DID NOT TARGET P53 FOR DEGRADATION WHEN
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               DOMAIN: REGION I IS SUFFICIENT FOR BINDING P53 AND INHIBITING ITS G1 ARREST AND APOPTOSIS FUNCTIONS. IT ALSO BINDS P73 AND E2F1.
REGION II CONTAINS MOST OF A CENTRAL ACIDIC REGION REQUIRED FOR INTERACTION WITH RIBOSOMAL PROTEIN L5 AND A PUTATIVE C4-TYPE ZINC FINGER. THE RING FINGER DOMAIN WHICH COORDINATES TWO MOLECULES OF ZINC INTERACTS SPECIFICALLY WITH A WHETHER OR NOT ZINC IS PRESENT AND MEDIATES THE HETERO-OLIGOMERIZATION WITH MIMM4. IT IS ALSO ESSENTIAL FOR ITS UBIQUITIN LIGASE E3 ACTIVITY TOWARD P53 AND
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  SIMILARITY: BELONGS TO THE MDM2 / MDM4 FAMILY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            SUBCELIULAR LOCATION: NUCLEAR AND CYTOPLASMIC. EXPRESSED PREDOMINANTLY IN THE NUCLEOPLASM. INVERACTION WITH ARF(P14) RESULTS IN THE LOCALIZATION OF BOTH PROTEINS TO THE NUCLEOL NUCLEOLAR LOCALIZATION SIGNALS IN BOTH ARF(P14) AND MDMZ MA
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              COFACTOR: ZINC IS RE
